To Whom it May Concern:

RE: Epsilon-Electric Fuel Ltd. Lifejacket Emergency Lights  
and European Patent No. 1 679 258 B1

Our Ref.: 4844/3 MMF/dm

We are US and Israeli patent attorneys representing Epsilon-Electric Fuel Ltd. in matters relating to intellectual property.

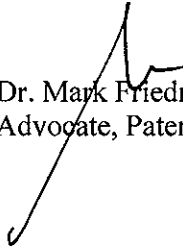

In letters to certain customers of Epsilon-Electric Fuel Ltd. dated 7 November 2011, SIC DIVISIONE ELETTRONICA S.R.L has alleged infringement of European Patent No. EP 1 679 258 B1 by the lifejacket emergency lights of Epsilon-Electric Fuel Ltd.

Under substantive patent law worldwide, in order for a device to infringe a patent, it must include all the elements or limitations in the claim. In the present case, all claims of the patent in question relate to an emergency indicator in which a LED is activated by a signal generated by combining two square wave signals provided by a timer circuit.

None of the lifejacket emergency lights manufactured and sold by Epsilon-Electric Fuel Ltd. employs circuitry as defined by the claims of EP 1 679 258 B1, or anything which could be considered equivalent thereto in structure or function.

EP 1 679 258 B1 is therefore not relevant for lifejacket emergency lights manufactured and sold by Epsilon-Electric Fuel Ltd.

Very truly yours,

  
Dr. Mark Friedman  
Advocate, Patent Attorney
